Alper Kartkaya

Computer Engineering Student

Profile

Fourth-year Computer Engineering student at Bogazici University focused on AI-driven software development. Interested in agentic/context engineering, machine learning, distributed systems, and computer networks. Eager to build robust software through hands-on projects.

Education

2022 - 2027
Bogazici University

B.Sc. Computer Engineering
GPA: 3.21/4

Skills

Programming
Python • C/C++ • Java • JavaScript • React • TypeScript • SQL

Computer Science
Data Structures • Algorithms • OOP • Operating Systems • Computer Networks • Distributed Systems

Software Development
CI/CD • Debugging • Git • REST APIs • Testing • Frontend • Backend

AI and Data
Machine Learning • LLMs • Transformers • Computer Vision • NLP • RAG

Tools and Databases
MySQL • SQLite • Wireshark • Linux • AWS • EC2/Nginx

Agentic Engineering
LLM Orchestration • MCP • Agent Workflows • Tool Use • OpenCode • OmO/OmX

Working Style
Creativity • Troubleshooting • Leadership • Problem Solving • Project Organization • Systems Thinking

Languages
Turkish • English • French

Experience

Builder & Founder @ izge

Apr. 2026 - Present

- Building an on-premise, local AI workspace for safety-critical industries, connecting company documents, conversations, and decisions into shared organizational memory.
- Developing source-grounded answers and in-chat AI assistance to surface relevant context and draft customer replies for human review.

On-premise AI • Local LLMs • Organizational Memory • AI Workflows

Software Engineer Intern @ Turkish Technology

Aug. 2026 - Sep. 2026 — 1 month

- Developed an MCP-based service that enables LLMs to access and retrieve relevant information from internal knowledge resources.
- Contributed to natural-language search and relevance-based discovery workflows for enterprise data assets.

MCP • LLM Tool Use • Information Retrieval • SQL

Artificial Intelligence Software Development Intern @ BAYKAR Technology

Aug. 2025 - Nov. 2025 — 4 months

Mar. 2026 - May 2026 — 3 months

- Contributed as an Artificial Intelligence Software Development intern in a fast-paced engineering environment.
- Applied practical software engineering, troubleshooting, and project organization skills to AI-focused development work.

Artificial Intelligence • Software Development • Machine Learning • Engineering Practice

Technical Focus

- Motivated to apply a strong theoretical foundation to practical system design, turning computer science concepts into working software architectures.
- Focused on designing and building software systems end to end, from product requirements and architecture to implementation and deployment.
- Interested in AI, distributed systems, and computer networks as engineering domains for robust, inspectable, and maintainable products.

Selected Achievement

National university entrance exam YKS'22 rank: 253rd
Ranked 253rd among roughly 3 million students in Turkey's national university entrance exam, earning admission to Bogazici University Computer Engineering, one of the country's most selective programs.
